

Glass Clips

Stylmark's Glass Clips provide added strength to interior glass walls by holding panels of glass in line with one another. These durable anodized aluminum clips provide decorative accents and accommodate 3/8" or 1/2" thick glass panels. The clips install easily with screws and plastic insulators protect the glass from fractures or chips. Pair Stylmark Glass Clips with our WallMaker system to ensure your interior glass wall meets city building codes and maintains a cohesive, high-quality look.
